Lewy Body Dementia Caregiving Symposium

Quiz Question #1

What is a Lewy body?

- An abnormal clump of protein
- A virus that infects the brain
- A parasite that infects the body
- A disorder that causes hallucinations

Lewy Body Dementia Caregiving Symposium

Quiz Question #1

What is a Lewy body?

An abnormal clump of protein

A virus that infects the brain

A parasite that infects the body

A disorder that causes hallucinations

Lewy Body Dementia Caregiving Symposium

Quiz Question #2

What protein is associated with a Lewy body?

- Tau
- Amyloid
- Alpha-synuclein
- Lewy
- Neuron

Lewy Body Dementia Caregiving Symposium

Quiz Question #2

What protein is associated with a Lewy body?

Tau

Lewy

Amyloid

Neuron

Alpha-synuclein

Lewy Body Dementia Caregiving Symposium

Quiz Question #3

Who was Dr. Lewy?

- An Austrian neurologist
- A German-American neurologist and neuropathologist
- A Hungarian psychiatrist
- An American science fiction author

Lewy Body Dementia Caregiving Symposium

Quiz Question #3

Who was Dr. Lewy?

- An Austrian neurologist
- A Hungarian psychiatrist
- A German-American neurologist and neuropathologist**
- An American science fiction author

Lewy Body Dementia Caregiving Symposium

Quiz Question #4

Lewy body dementia is an umbrella term that includes which disorders:

- Parkinson's disease dementia *-and-* Dementia with Lewy bodies
- Parkinson's disease *-and-* Alzheimer's disease
- Parkinson's disease *-and-* Hallucinations
- Dementia with Lewy bodies *-and-* Hallucinations
- Dementia with Lewy bodies *-and-* Alzheimer's disease

Lewy Body Dementia Caregiving Symposium

Quiz Question #4

Lewy body dementia is an umbrella term that includes which disorders:

- Parkinson's disease dementia -and- Dementia with Lewy bodies**
- Parkinson's disease -and- Alzheimer's disease
- Parkinson's disease -and- Hallucinations
- Dementia with Lewy bodies -and- Hallucinations
- Dementia with Lewy bodies -and- Alzheimer's disease

Lewy Body Dementia Caregiving Symposium

Quiz Question #5

True or False: Lewy body dementia is a rare disorder?

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #5

True or False: Lewy body dementia is a rare disorder?

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #6

True or False: Parkinson's Disease is a Lewy body disease.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #6

True or False: Parkinson's Disease is a Lewy body disease.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #7

Select the symptom that EVERYONE with Lewy body dementia must have to be diagnosed with probable Lewy body dementia:

- Parkinson's Disease
- Blood pressure problems
- Lewy bodies
- Visual hallucinations
- Tremor
- Dementia

Lewy Body Dementia Caregiving Symposium

Quiz Question #7

Select the symptom that EVERYONE with Lewy body dementia must have to be diagnosed with probable Lewy body dementia:

Parkinson's Disease

Lewy bodies

Tremor

Blood pressure problems

Visual hallucinations

Dementia

Lewy Body Dementia Caregiving Symposium

Quiz Question #8

To be diagnosed with probable Dementia with Lewy Bodies, someone must have dementia. In addition, someone must have two of four other symptoms called "core clinical features."

Select the four symptoms that are on that short list.

- Visual hallucinations
- Parkinsonism
- Fluctuating cognition
- REM sleep behavior disorder
- Loss of sense of smell
- Orthostatic hypotension
- Erectile dysfunction
- Seizures or loss of consciousness

Lewy Body Dementia Caregiving Symposium

Quiz Question #8

To be diagnosed with probable Dementia with Lewy Bodies, someone must have dementia. In addition, someone must have two of four other symptoms called "core clinical features."

Select the four symptoms that are on that short list.

- Visual hallucinations
- Parkinsonism
- Fluctuating cognition
- REM sleep behavior disorder
- Loss of sense of smell
- Orthostatic hypotension
- Erectile dysfunction
- Seizures or loss of consciousness

Lewy Body Dementia Caregiving Symposium

Quiz Question #9

Select the three cardinal features of parkinsonism.

- Slow movement
- Tremor
- Rigidity
- Small handwriting
- Hallucinations
- Delusions
- REM sleep behavior disorder
- Depression
- Loss of sense of smell

Lewy Body Dementia Caregiving Symposium

Quiz Question #9

Select the three cardinal features of parkinsonism.

- Slow movement
- Tremor
- Rigidity
- Small handwriting
- Hallucinations
- Delusions
- REM sleep behavior disorder
- Depression
- Loss of sense of smell

Lewy Body Dementia Caregiving Symposium

Quiz Question #10

True or False: Anger and depression can be symptoms of Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #10

True or False: Anger and depression can be symptoms of Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #11

True or False: Memory problems alone are sufficient to diagnose someone with dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #11

True or False: Memory problems alone are sufficient to diagnose someone with dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #12

True or False: People with Lewy body dementia may not have significant memory problems.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #12

True or False: People with Lewy body dementia may not have significant memory problems.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #13

True or False: If someone has Lewy body dementia, they can also have Alzheimer's Disease.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #13

True or False: If someone has Lewy body dementia, they can also have Alzheimer's Disease.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #14

True or False: The actor and comedian Robin Williams had Lewy body dementia, confirmed through brain autopsy.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #14

True or False: The actor and comedian Robin Williams had Lewy body dementia, confirmed through brain autopsy.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #15

True or False: The actor Bruce Willis has a diagnosis of Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #15

True or False: The actor Bruce Willis has a diagnosis of Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #16

True or False: Lewy body dementia is more common in men.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #16

True or False: Lewy body dementia is more common in men.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #17

True or False: People caring for spouses with Lewy body dementia report a more severe caregiving burden than people caring for parents with Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #17

True or False: People caring for spouses with Lewy body dementia report a more severe caregiving burden than people caring for parents with Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #18

What percentage of Lewy body dementia caregivers feel that those around them don't understand their burden?

20%

50%

80%

100%

Lewy Body Dementia Caregiving Symposium

Quiz Question #18

What percentage of Lewy body dementia caregivers feel that those around them don't understand their burden?

20%

50%

80%

100%

Lewy Body Dementia Caregiving Symposium

Quiz Question #19

True or False: Lewy body dementia is usually inherited.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #19

True or False: Lewy body dementia is usually inherited.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #20

True or False: Lewy body dementia can be confused for mental illness.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #20

True or False: Lewy body dementia can be confused for mental illness.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #21

True or False: If your family member with Lewy body dementia experiences a sudden worsening of motor or cognitive symptoms, you should consider a urinary tract infection or other type of infection.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #21

True or False: If your family member with Lewy body dementia experiences a sudden worsening of motor or cognitive symptoms, you should consider a urinary tract infection or other type of infection.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #22

True or False: There are now biomarkers that can definitively prove that a living person has Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #22

True or False: There are now biomarkers that can definitively prove that a living person has Lewy body dementia.

True

False

Lewy Body Dementia Caregiving Symposium

Quiz Question #23

When someone with a clinical diagnosis of Lewy body dementia dies and the brain is examined, how often is Lewy body dementia confirmed through post-mortem analysis of the brain?

- Almost never
- 10% of the time
- 30-50% of the time
- Almost always

Lewy Body Dementia Caregiving Symposium

Quiz Question #23

When someone with a clinical diagnosis of Lewy body dementia dies and the brain is examined, how often is Lewy body dementia confirmed through post-mortem analysis of the brain?

Almost never

10% of the time

30-50% of the time

Almost always

Lewy Body Dementia Caregiving Symposium

Quiz Question #24

When someone with a clinical diagnosis of Lewy body dementia dies, the brain is examined, and Lewy body dementia is confirmed, how often is Alzheimer's pathology also found through post-mortem analysis of the brain?

- Almost never
- 10% of the time
- 30-50% of the time
- Almost always

Lewy Body Dementia Caregiving Symposium

Quiz Question #24

When someone with a clinical diagnosis of Lewy body dementia dies, the brain is examined, and Lewy body dementia is confirmed, how often is Alzheimer's pathology also found through post-mortem analysis of the brain?

- Almost never
- 10% of the time
- 30-50% of the time
- Almost always**

Lewy Body Dementia Caregiving Symposium

Quiz Question #25

True or False: When someone with a clinical diagnosis of Lewy body dementia dies and the brain is examined, it is unusual to find only Lewy body pathology in the brain (so, no other pathology).

Yes

No

Lewy Body Dementia Caregiving Symposium

Quiz Question #25

True or False: When someone with a clinical diagnosis of Lewy body dementia dies and the brain is examined, it is unusual to find only Lewy body pathology in the brain (so, no other pathology).

Yes

No
