

## “Patient with PSP”

Presented by:

Jeanette Brown, MD (retired)

San Francisco

brownmdj556@gmail.com

I am a retired physician, age 64. I presently receive care at UCSF with Dr. Boxer, I was diagnosed on 3/16. I am in a clinical trial with Dr. Boxer for PSP. I have just retired from UCSF after a long and successful career in clinical research. I am in the early stages of PSP, and I have moved to San Francisco because I can no longer drive. I welcome anyone with PSP to contact me.

Brain Support Network has assisted me in getting the word out that I have started a support group for those with a PSP or CBS diagnosis to join a support group meeting in SF. We have had a couple of meetings thus far.

Also, any caregivers attending the Brain Support Network regular caregiver-only support group meeting in San Mateo are invited to let BSN know in advance if their family member with a PSP or CBS diagnosis would like to join me at Mimi's Café at a separate table to talk.
